

**Madras Fertilizers Limited (MFL) is a Government of India undertaking manufacturing of Urea and Complex Fertilizers in Manali Chennai. MFL utilizes 14.5 Million Litres per day (MLD) of water for the production of its fertilizers. At times due to various short supply issues during emergency, MFL needs additional water to continue the operations without interruptions safely.**

**MFL invites Expression of Interest to purchase raw water from the reputed and reliable suppliers thru tankers or some other sources also as and when required at competitive rates. The quality of water shall meet the required specifications, which will be shared with the interested suppliers. MFL is likely to purchase around 10,000 KL/ month (300-600 tankers).**
